1	Number of GPS installations	Total number of GPS installations in the fiscal period. GPS monitoring can be ordered by a judge for certain offenses as a condition of bond, or after conviction as a condition of probation. These individuals have a GPS ankle monitor installed by APD staff. GPS is used in cases where an individual's movements may be restricted from certain geographic areas, including within a certain area of a victim. Victims may also opt to carry a mobile device that sets a mobile exclusion zone. If an offender breaches this zone, an alert is triggered and Home Confinement responds.	829	908	839	834	229	242				
2	Number of radio frequency installations	Total number of radio frequency installations in the fiscal period. Radio frequency (RF) monitoring is used to monitor curfew or home confinement. It cannot track movement, but can track when an individual is within range of a receiving station that is either hooked up to a landline phone or a cellular connection. If an individual is outside of the range of the receiver, an alert is triggered.	1,449	1,388	1,343	1,396	294	327
