This dashboard presents seven key performance measures being used to monitor implementation of the Model Bond Court initiative in the Circuit Court of Cook County.

Measure 1A. Cook County Jail Monthly Average Daily Population Trends: October 2017 -March 2018[^]

[^] Average Daily Population "ADP" calculations generated by the Office of the Chief Judge (OCJ) Information Services Department using "Sheriff's Daily Report" (October 2017 – March 2018). The daily reports are provided to the OCJ by the Cook County Sheriff's Office Bureau of Information and Technology Business Intelligence Unit. The Sheriff's Daily Report does not provide subcategory breakdown of the inmate population (e.g., pre-trial detainees, sentenced individuals, charged with felony or misdemeanor, etc.). The monthly ADP calculation totals the number of inmates on each day of the month being measured divided by the number of days in the month.

* The Confined Population consists of the male and female divisional population, Hospital, VRIC, Pre-Release Treatment Programs, and Residential Treatment programs, as well as the off-site population confined in jails outside of Cook County. The general population consists of the male and female division population on site at CCDOC. The Community Corrections Population includes Sheriff's Electronic Monitoring and VRIC post-release.

Non-Bailable Bonds

- 13.1% of the defendants who received an initial no-bail order secured a bailable bond during a subsequent court date which resulted in an initial pretrial release from custody.

* A non-admission to Sheriff's EM may be because a defendant (1) has a more restrictive bond (e.g., unpaid D-Bond on a current case or a No Bail Hold on another active pre-trial or probation case); (2) is determined to be ineligible for Sheriff's EM (e.g., no place to stay or active IDOC or out of jurisdiction warrant); or (3) refuses placement on Sheriff's EM.
